## (54) T-NUT

## (57)Abstract:

**PURPOSE:** To aim at the promotion of efficiency in the clamping work of a T-nut by forming a hole simultaneously driving this T-nut into a fastening object without providing the hole in this object in advance.

**CONSTITUTION:** A cap 6 is attached to a hollow shank 2 formed with an internal thread 4 on the inner circumferential surface so as to close an owing at the end reverse to a flange part 3. With this constitution, any punch swarf to be produced by what such a hole as receiving the shank by means of driving the T-nut itself is formed in a fastening object is preventable from getting into the shank owing to the cap.

## LEGAL STATUS

[Date of request for examination] 16.11.1994

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2597288

[Date of registration] 09.01.1997

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
